Flow Path

1. Center port is public port, valve switch to specific port by programming control
2. Wetted material - PCTFE valve head and sapphire valve rotor and stator, non-metal, anti corrosive anti high temperature, wear resistance
3. Flow configuration - 6/8/10 port and 1.2mm orifice to meat different applications
4. Reset position - SV-04 valve reset by CCW (non-changeable), rotor stay between port 1 and maximum port, public port disconnected with any port when valve at reset position
5. OEM service - RUNZE support special flow path design and customize

Dimension (unit: mm)

Note: 6/8/10 port valve share the same dimension
